

Package ‘PCAWG7’

October 13, 2020

Title Repository of data from 'Repertoire of Mutational Signatures in Human Cancer'

Version 0.0.2

Description Contains data from Alexandrov, Kim, Haradhvala, Huang et al.,
'Repertoire of Mutational Signatures in Human Cancer'. Still a work in progress,
so not all data from the paper are available. Contact the author of the package with
requests.

License GPL-3

Language en-US

Encoding UTF-8

LazyData true

Depends R (>= 3.5),

RoxygenNote 7.1.1

Suggests BSgenome,
BSgenome.Hsapiens.1000genomes.hs37d5

R topics documented:

exposure	1
PCAWG.sample.id	2
PCAWG.WGS.DBS	3
PCAWG.WGS.SBS.96	3
signature	3
spectra	4

Index	5
--------------	----------

exposure	<i>PCAWG7 SigProfiler assignments (exposures).</i>
----------	--

Description

PCAWG7 SigProfiler assignments (exposures).

Usage

exposure

Format

A list with the elements:

PCAWG A list with the elements:

SBS96 Strand-agnostic single-base substitutions in trinucleotide context.

DBS78 Strand-agnostic doublet-base substitutions.

ID Strand-agnostic indels. These are signature assignments for the PCAWG platinum genomes.

TCGA A list with the elements:

SBS96 As above.

ID As above. These are signature assignments for the TCGA exomes.

other.genome A list with the element:

SBS96 As above. This contains signature assignments for non-TCGA genomes.

other.exome A list with the element:

SBS96 As above. This contains signature assignments for non-TCGA exomes.

Source

Files of <https://www.synapse.org/#!/Synapse:syn12009743>, 2019 Oct 09, populated by data-raw/sig.profiler.

PCAWG.sample.id	<i>Vectors of the PCAWG tumor_wgs_icgc_specimin_ids.</i>
-----------------	--

Description

Note that the PCAWG7 spectra catalogs have 2 sample ids that were blacklisted after the mutational signature analysis was underway. The blacklisted samples are SP116419 and SP116883, which are in `PCAWG.sample.id$black`.

Usage

`PCAWG.sample.id`

Format

A list with the elements:

white Whitelisted IDs

grey Greylisted IDs

black Blacklisted IDs

PCAWG.WGS.DBS	<i>Doublet Base Substitution (SBS) spectra (deprecated). Use spectra\$DBS78 instead.</i>	Use
---------------	--	-----

Description

Doublet Base Substitution (SBS) spectra (deprecated). Use [spectra\\$DBS78](#) instead.

Usage

PCAWG.WGS.DBS

Format

An object of class `matrix` (inherits from `array`) with 78 rows and 2780 columns.

PCAWG.WGS.SBS.96	<i>Single Base Substitution (SBS) spectra in trinucleotide context (deprecated). Use spectra\$SBS96 instead.</i>
------------------	--

Description

Single Base Substitution (SBS) spectra in trinucleotide context (deprecated). Use [spectra\\$SBS96](#) instead.

Usage

PCAWG.WGS.SBS.96

Format

An object of class `matrix` (inherits from `array`) with 96 rows and 2780 columns.

signature	<i>PCAWG7 SigProfiler reference signatures.</i>
-----------	---

Description

PCAWG7 SigProfiler reference signatures.

Usage

signature

Format

A list with the elements:

genome A list with the elements:

SBS96 Strand-agnostic single-base substitutions in trinucleotide context.

SBS192 Transcriptionally stranded single-base substitutions in trinucleotide context.

DBS78 Strand-agnostic doublet-base substitutions.

ID Strand-agnostic indels.

exome A list with the elements:

SBS96 As above, for exome count signatures, which look different than genome count signatures, because of differences in trinucleotide frequencies in exomes versus whole genomes.

Source

Subdirectories of <https://www.synapse.org/#!/Synapse:syn12009743>, 2019 Oct 09, populated by `data-raw/populate.variable.signature.R`.

spectra	<i>PCAWG7 mutational spectra (catalogs).</i>
---------	--

Description

PCAWG7 mutational spectra (catalogs).

Usage

spectra

Format

A list with the elements:

SBS96 Deprecated.

DBS78 Deprecated.

PCAWG A list with the elements:

SBS96 Strand-agnostic single-base substitutions in trinucleotide context.

SBS192 Single-base substitutions in transcripts based on the sense strand.

SBS1536 Strand-agnostic single-base substitutions in pentanucleotide context.

DBS78 Strand-agnostic doublet-base substitutions.

ID Strand-agnostic indels.

TCGA A list with the same elements as the PCAWG element.

other.genome A list with the same elements as the PCAWG element but with ID omitted.

other.exome A list with the same elements as the PCAWG element but with ID omitted.
